

Cloud FinOps by T-Systems

Control cloud costs and maximize business value

Typical cost challenges in the cloud

Unclear spending

Unpredictable and random costs

Complex governance model

Confusing roles and accountability

Absence of tools and metrics

Calculating costs is a challenge

Lack of data democratization

No framework for data democratization

Low levels of cost awareness

Financial impact of activities is not considered

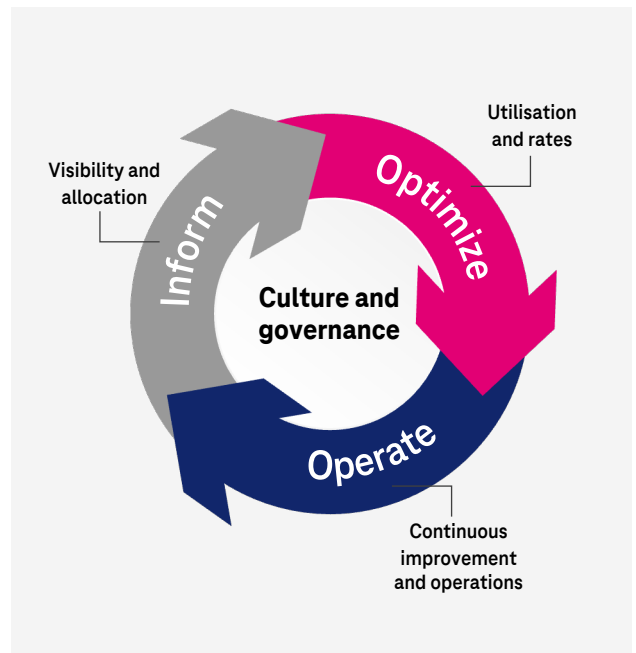

FinOps helps different teams to collaborate and get a clear picture of cost spending. The goal is to optimize and achieve maximum business value.

Parts of the offer

- Plan-build-run with Cloud FinOps framework
- Expert advisory and audit on cloud cost optimization
- Centralized cloud cost orchestration solution
- Standard governance framework and processes for FinOps implementation
- Development of use cases, KPIs, and metrics
- Development of FinOps capabilities: people, process, and technology
- Identification of cost-saving opportunities

The benefits

- Understand and optimize cloud spend
- Improve financial performance by optimizing cloud costs
- Create visibility of cloud spends, increase transparency in the company (showback and chargeback)
- Enable data-driven decision making through a clear view of cloud spend
- Provide support to set up a sustainable cloud cost governance

Short term

FinOps Kickstarter

- Assessment of the current FinOps maturity level
- Review of the cloud costs (usage, allocation, forecasts, unit measurement)
- Analysis of the governance model for cloud cost optimization
- Detection of potential for cloud cost savings (e.g., PoV project)

Plan

FinOps Accelerator

- Development of FinOps roadmap
- Implementation of FinOps model
- FinOps framework planning and creation
- Creation of a cloud cost governance setup

Build

FinOps as a Service

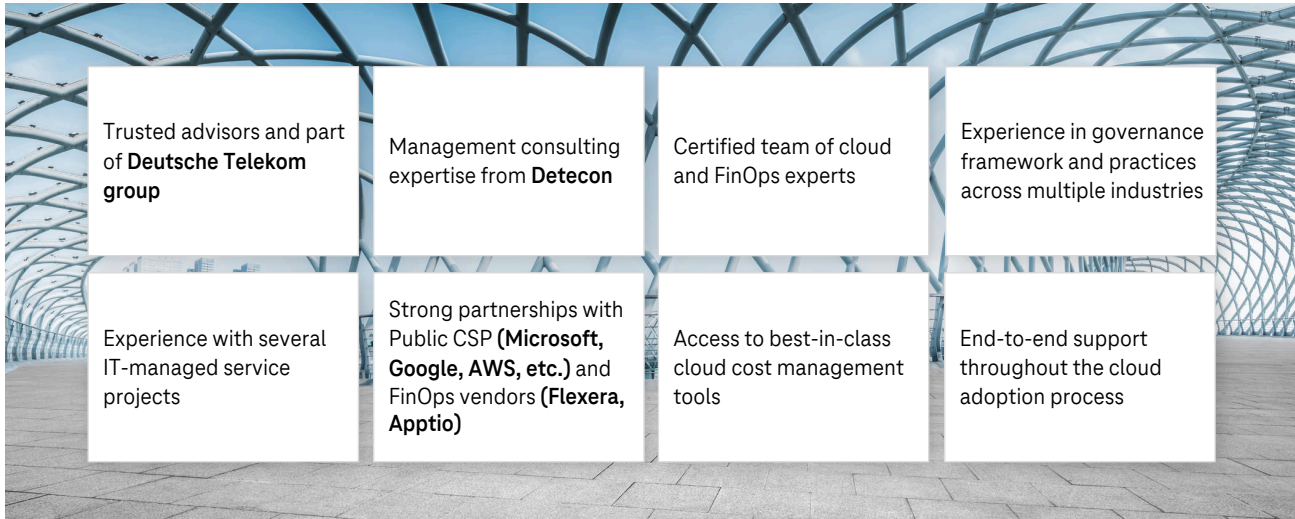

- FinOps Accelerator +
- Integration of processes and FinOps governance model
 - Knowledge sharing and long-term culture changes

Run

Long term

Solve challenges with the right partner
